MIT ADT University, Pune School of Holistic Development

**Year: First
Semester: I**

**Course: English Communication & Holistic Personality
Programme- 1
Course Code: 23SHD2001
Credits – 2**

Course Code	23SHD2001			
Course Title	English Communication and Holistic Personality -1			
Teaching Scheme	Lecture	Tutorial	Practical	Credits
	1	-	2	2

Pre-requisites: Candidates having a minimum of A2 level of proficiency in English (basic user at a threshold level) according to the Common European Framework of Reference for Languages (CEFR, 2001). The same will be determined by a mapping test conducted at the beginning of the course.

Course Objectives:

The main objectives of the course are:

1. To provide learners with ample opportunities to be proficient users of English in major areas – *oral & written communication, reading & listening comprehension, and use of vocabulary & grammar*
2. To prepare learners to effectively use of the English language for communication purposes in a variety of contexts (*e.g., personal, social, and academic*), for different purposes (*e.g., writing a persuasive resume and an effective job application letter*) and at different levels of language use proficiency (A1-C2; CEFR, 2001)
3. To develop the student's self-confidence and nurture them into becoming holistic personalities
4. To apply life skills in real-life situations through collaborations
5. To overcome psychological challenges that hamper learning by incorporating educational technologies and various teaching strategies

Course Outcomes: *After studying the course, learners will be able to:*

1. give clear, developed oral descriptions, and make presentations to implement the strategies of written communication, reading and listening comprehension
2. produce texts on a variety of subjects by synthesizing and evaluating information from several sources to perform multiple functions of written and oral communication for personal and professional purposes
3. practise and utilize various personality attributes by engaging themselves in personality development activities
4. use life skills for day-to-day situations in professional and personal lives

5. implement various strategies for a growth mindset and overcome psychological barriers in the learning process

Course Description:

English Communication and Holistic Personality is a unique course offered by the School of Holistic Development for first-year learners aiming at their overall personal development – linguistic, cognitive, behavioural, professional, and psychomotor skills. Regarding language, it aims at helping learners with a threshold level of English (A2 level, CEFR) to advance their language skills to an intermediate (B1) and/or upper-intermediate level (B2).

This course covers many interesting topics including food, sports, leisure, modern life, globalization, and technology. Learners learn to write different types of formal and informal texts including reports, reviews, complaints and more. They can also enrich their vocabulary by reading texts of different genres and practising the use of error-free language in specific contexts and communicate effectively and confidently.

Induction Programme:

An induction programme is organized to orient and introduce participants to:

1. MIT-ADT University
2. School of Holistic Development (SHD)
3. Courses offered by the School of Holistic Development
4. Proficiency test
5. Cambridge certification in Semester 2

Course Contents:

Unit No.	Topics	Hours
1	Use your language wisely! Subtopics: 1. Review of parts of speech with activities & games 2. Use of different tenses and aspects 3. Commonly confused words and sentence ambiguity 4. Common errors in English & ways to overcome them 5. Essentials of Communication Skills (types, model, 7Cs, barriers)	4 hrs.
2	Goal Setting (SWOT) and Basics of Time & Stress Management Subtopics: 1. SWOT Analysis 2. Goal Setting Booklet 3. Time & Stress management	2 hrs.
3	Learn to Listen with Ears and Eyes Subtopics: 1. Listening for general content 2. Listening to fill up information 3. Types of listening 4. Listening for specific information	4 hrs.

	5. Barriers to listening 6. Comprehension tests

MIT ADT University Pune

School of Holistic Development

Syllabus for Year: 2024-25
Semester: I

Course: Health Practices (HP) - 1
Course Code: 23SHD1005
Credits – 1

Course Code	23SHD1005			
Course Title	Health Practices (HP) - 1			
Teaching Scheme	L	T	P	Credits
	0	0	2	1
Total Teaching Hrs.	30 hours (15 sessions)			

Pre-requisites:

The participant is required to be:

- physically fit
- willing to develop and maintain physical health
- self-motivated to do daily health-related and mental activities
- respectful towards the trainer/faculty and follow their instructions and abide by the University rules

Course Objectives:

The main objectives of the course are:

1. To create awareness of physical fitness among students with extended and unmonitored exposure to electronic gadgets
2. To motivate students to instill healthy practices by making conscious choices in nutritious food and everyday exercises for overall fitness
3. To become physically and mentally fit
4. To become more active, energetic and enjoy life in the best possible ways
5. To analyse and monitor basic health related issues

Course Outcomes:

After studying the course, students will be able:

1. To concentrate and study effectively
2. To enhance physical fitness and awareness
3. To improve physical conditioning related to flexibility
4. To develop and maintain a personal yoga practice
5. To develop greater empathy and compassion towards others

Course Description:

This course helps students further their health practices for general as well as specific purposes and develop fundamentals in yoga, meditation, aerobics, gym, physical training and diet.

Exercises at the gym boost energy and help participants to maintain body weight and overall fitness.

Physical training exercises help improve the cognitive ability of an individual, mental health and memory

Aerobics helps to improve cardiovascular conditioning and improves lung function

Course Contents:

1. Development and progression of Flexibility and breath control
2. Experience the relationship between mind, body, and spirit
3. Concepts and basics of warm up and cool down
4. Safety principles in a health practice
5. Orientation & Induction to the Health Practices Program and establishing the importance of overall fitness – A healthy Body that houses a healthy mind.
6. Student Pre-Evaluation Test - A test depicting the existing fitness of the students will be checked and recorded

Unit No.	Topics	Hours
----------	--------	-------

1.	Pre-Assessment & Goal Setting (WIIFM) Trainers conduct a test and maintain data to know the students' progress Setting Learning Objectives with this course	3
2.	Basic Yoga Postures, Surya Namaskar & Fatigue Management, Basic Pranayama, Basic Meditation Along with Mental Health Awareness Practice entails Surya Namaskar, Different types of Yoga Postures for better alignment and coordination between mind & body, and different types of other Pranayama Practices such as Kapala Bhati, Bhastrika, And Nadi- Shodhan, Surya Bhedan, Chandra Bhedan, Surya Vilome, Chandra Vilome, Ujjayi, Bhramari Pranayama without holding of breath but with deeper awareness, along with different Mudras use in Yoga Practices & pranayama, Breath Awareness along with Meditation Practices to get feel inner being & Fatigue Management Asana and Relaxation Postures to recover the body like Yog Nidra & Nadaanushandana	8

3.	Gym Exercises Different movements to make muscles work and burn calories. Physical activities like swimming, running, jogging, walking, and dancing etc. Outcomes: 1. It can make you feel happier. 2. It is good for your muscles and bones. 3. It can increase your energy levels 4. It can help your brain health and memory.	4
----	---	---

4.	Strengthening Exercises Strength and flexibility exercises to increase muscle strength, maintain bone density, improve balance, and reduce joint pain. Below are some strengthening exercises. 1. Climbing Stairs with squats 2. Cycling with core stability exercises and running 3. Dance/Aerobic with modified push up 10 counts Upper Body, Lower Body, and Core Strengthening Exercises.	4
5.	Diet/Nutrition, Why It's Important? Good nutrition and physical activity to maintain a healthy weight. benefits of good nutrition beyond weight. Nutrition to reduce the risk of diseases including heart disease, diabetes, stroke, some cancers, and osteoporosis: 1. Reduce high blood pressure 2. Lower high cholesterol 3. Improve your well-being 4. Improve your ability to fight off illness 5. Improve your ability to recover from illness or injury 6. Increase your energy level	4
6.	Aerobics Moving large muscles in arms, legs and hips. Body's responses Breathing faster and more deeply maximizing the amount of oxygen in blood. Heart beat better blood flow to muscles and back to lungs. 1. Improves cardiovascular conditioning. 2. Decreases risk of heart disease. 3. Lowers blood pressure. 4. Increases HDL or "good" cholesterol. 5. Helps to better control blood sugar. 6. Assists in weight management and/or weight loss. 7. Improves lung function. 8. Decreases resting heart rate. (The aerobics trainer will lead the activity)	4

7.	Post-Course Assessment & Report: Respective trainers will compare the pre and post assessment and reports to the respective Director sir. (The trainers will provide counselling if needed)	3
Total:		30 hours
Learning Resources: The whole programme will be delivered through interactive sessions: 1. Group discussions and practices 2. Videos/activities 3. Guest/Expert Speakers 4. Self-motivation to learn

It is good for your muscles and bones. It can increase your energy levels It can help your brain health and memory.	3
3	Strengthening Exercises Strength and flexibility exercises to increase muscle strength, maintain bone density, improve balance, and reduce joint pain. Below are some strengthening exercises. 1. Climbing Stairs with squats (10 stairs+10 squats) 2. Cycling with core stability exercises and running 3. Dance/Aerobic with modified push up 10 counts Upper Body, Lower Body and Core Strengthening Exercises .	3

4	Physical Training Physical fitness is achieved by developing the motor abilities/motor skills/motor qualities of strength, endurance, speed, flexibility. Coordination among the eye – hand and eye-foot and Neuromuscular coordination - Harmonious development – All round development/overall development of the body by exercising every part of the body in every session of physical training. - Systematic progression – Physical training should be progressive in nature. - The degree of difficulties should keep increasing in the Physical training session for improvement of the Physical ability of an individual. - Continuity – To maintain Physical fitness and health the Physical activity must be carried out regularly. SEQUENCE OF INSTRUCTION IN PHYSICAL EXERCISES - Demonstration by the instructor - Practice by the students - Corrections by instructor - Repetition by the students Benefits. Exercise improves the muscle tone, builds the muscles, Increases the length and elasticity of the muscles and overall strength of muscles. Stretching improves the suppleness and range of motion of the joints and lubricates the joints, thus prevents injuries to muscles, joints, and bones. SEQUENCE OF A PHYSICAL TRAINING SESSION - Warm up – General and specific - Main activity/Physical training session - Cool down	6
----------	---	----------

5	SWIMMING IMPORTANT The most important reason is that swimming is the only sport which can save your child's life..... Get your child involved here. Drowning is still one of the most common causes of accidental death in children, so being able to swim is an essential life-saving skill. Anyone can learn to swim, even past the age where it would have been an easily acquired skill. Moreover, everyone should learn to swim because it feels awesome. ... Being comfortable in the water is not only a life safety skill, but one that will very much better your quality of life. BENEFITS OF SWIMMING Swimming is low impact. Unlike jogging or plyometric training, swimming is a way to fit cardio into your workout routine without putting stress on your bones, joints and muscles. This is a plus for swimmers of all ages and body types, but it's particularly beneficial for seniors and people with arthritis.	2
6	Diet/Nutrition, Why It's Important? Good nutrition and physical activity to maintain a healthy weight. benefits of good nutrition beyond weight. Nutrition to reduce the risk of diseases including heart disease, diabetes, stroke, some cancers, and osteoporosis: Reduce high blood pressure Lower high cholesterol Improve your well-being. Improve your ability to fight off illness. Improve your ability to recover from illness or injury Increase your energy level.	4
7	Aerobics Moving large muscles in arms, legs and hips. body's responses Breathing faster and more deeply maximizing the amount of oxygen in blood. Heart beat better blood flow to muscles and back to lungs. (The aerobics trainer will lead the activity)	2
8	Post-Course Assessment/ Evaluations Results & Report: Respective trainers will compare the pre and post-assessment and report to the respective Director sir. (The trainers will provide counselling if needed)	2

Total:

30 hours

Co-curricular & Extra Curricular Activities

1. Organize Yoga International Day
2. Global Suryanamaskar Day
3. World Health Day
4. World Water Day
5. Mini Marathon (Organized by MITADU)
6. Wellness Camp
7. Sujok Therapy

Note 1:

The student who wishes to avail the facility of Gym/Swimming pool will have to submit in undertaking.

Students with any physical disability or health related issues must submit a medical certificate along with relevant documents/reports duly signed by a qualified doctor (minimum MBBS) to the Course Coordinator.

Students need to submit all the medical certificates/reports to your respective school coordinator with doctors' letterhead, stamp, and signature. The doctor should be MBBS or above qualified.

Note 2:

The student should practice everything that is taught as per his/her physical strength and capacity. Over exercise might be harmful if the participant is under any medication.

MIT ADT University, Pune School of Holistic Development

Syllabus for University Common Compulsory (UCC) Courses Year: Second Semester: III

Course: Societal Immersion, Spirituality & Morality- 1 Course Code: 23SHD1007 Audit Course

Course Code	23SHD1007			
Course Title	Societal Immersion, Spirituality & Morality-I			
Teaching Scheme	L	T	P	Credits
	0	0	2	0
Total Course Teaching Hrs.	15 hours			
Pre-requisites: Participants interacted in collaborative social activities and cooperate with peers, learn value-based aspects, show higher level of team spirit and dedication.				
Course Objectives: The main objectives of the course are: 1. To nurture youth for societal immersion and develop their innate spirituality and moral values. 2. To inculcate values of enquiry and research among students; and thereby develop their problem solving and decision-making abilities. 3. To sensitize students towards the needs of people at individual, group and community levels and to social problems in the changing social, cultural and techno-economic context. 4. To reflect on the values of social justice, human rights, empathy, hard and honest work- thereby developing the vision to work towards an egalitarian society among them. 5. To innovate and contribute to the growth of the society and spirituality and morality and feel elevated.				
Course Outcomes: After studying the course, students will be able to: - incorporate spiritual and social values amongst themselves that will naturally lead to respect for other religions and pursue mutual understanding and interaction among different faith, resulting in enrichment of religious cultures rooted in each faith tradition. - explore and classify what right and wrong and then apply the right values in their lives. - develop greater empathy and more compassion for others. - take greater responsibility for their own actions. - discover how to be happy, confident, and responsible members of the society. - contribute to the growth of the nation and bring harmony and peace for the betterment of the world.				

Course Description:

This course explores the interrelationship between “spirituality” and “morality” of human experience. “Spirituality” designates the human longing for a sense of meaning through morally responsible relationships between diverse individuals, families, communities, cultures and religions. Thus, the participants will know this association and its’ effects on societal immersion. This course is designed to enhance social work practice by (a) recognizing and utilizing the qualities of a spirituality sensitive helping relationship, and (b) acquiring knowledge about ways to deal with matters of the human spirit.

Course Contents:

Unit No.	Topics	Hours
1	Main topic: Immersion and social responsibility Subtopics: Community development, social problems, design thinking and innovation, duties and responsibilities (Field work). By the end of this unit, learners will be able to: 1. Identify problems of the society. 2. Understand the level of complexity of the problems. 3. Recognize differences between facts and opinions. 4. Understand their duties and responsibilities. 5. Able to prepare work plans and their execution.	03
2	Main topic: Spirituality and the Purpose of Life Subtopics: Spiritual paths- Hinduism, Islam, Christianity, Jainism, Buddhism, Sikhism, Judaism and other (Field work) By the end of this unit, learners will be able to: 1. Co-curricular & Extra Curricular Activities

1. College Camps, Bon-fire events.
2. Farm Visits: The participants will make visit to farm-fields and meet farmers to help them know advanced techniques and innovations in farming like organic farming, reuse of food waste. (Based on *Unnat Bharat Abhiyan*).
3. *Swachh Bharat Abhiyan-Cleanliness*: This is inspired by *Gadge Baba Gram Swachata Abhiyan*. The participants will visit the nearby villages, railway stations, public places to create awareness among the people.
4. Exhibitions organization.
5. Industry Experience: seeking training from industry experts or skilled people. (Industry visits under CSR activities).

MIT ADT University, Pune School of Holistic Development

**Year: Second
Semester: IV**

**Course: Societal Immersion, Spirituality & Morality- 2
Course Code: 23SHD1008
Audit Course**

Course Code	23SHD1008			
Course Title	Societal Immersion, Spirituality & Morality-II			
Teaching Scheme	L	T	P	Credit
	0	0	2	0
Total Course Teaching Hrs.	15 hours			

Pre-requisites:

The participants will need to show willingness to participate in collaborative social activities and cooperate with peers, learn value- based aspects, show higher level of team spirit and dedication.

Course Objectives:

The main objectives of the course are:

- To nurture youth for societal immersion and develop their innate spiritual and moral values.
- To inculcate in the student's values of enquiry and research; and thereby develop problem solving and decision-making abilities.
- To develop the ability to face challenging situations in life and solve them confidently
- To imbibe in the learners the values of social justice, human rights, empathy, hard and honest work- thereby developing in them the vision to work towards an egalitarian society.
- To enable youth to progress from intolerance to dedication.

Course Outcomes:

After studying the course, students will be able to:

- promote value system that emphasizes dignified and harmonious coexistence and solidarity among people of different class, ethnic, religious cultural and ideological backgrounds.
- develop and demonstrate ethical and professional behaviour.
- engage with individuals, farmers, organizations, spiritual leaders to help them inculcate the modern day social and environment justice.
- acquire and to live with bliss and feel spiritually elevated.
- construct and demonstrate the ability to bring harmony to the society they are a part of.

Course Description:

Epistemologically, the course assumes that there are many avenues to human knowing. As such, this course explores various scientific approaches to study the relationship between spirituality, religion and health making a reductionist assumption that scientific methodologies are superior to critical philosophic ways of knowing, feeling, and judging. Contributing to our understanding of religion and spirituality are institutional religious beliefs imbedded in historical oral traditions, written scriptures, liturgical rituals, organized works of charity, and legal authority structures. Finally, the course explores how individuals view spirituality and religion as they move through the life cycle, thereby integrating theories of human development.

Course Contents:

Unit No.	Topics	Hours
1	Main topic: Societal Immersion and responsibility Subtopics: Social Culture, Issues or problems of Society, Social development, values and development, Moral Duties and Responsibilities (Field work) By the end of this unit, learners will be able to: 1. Solve problems of the society 2. Understand the level of complexity of the problems 3. Gain an understanding of rural life, culture, and social realities 4. Understand their duties and responsibilities 5. Prepare work plans and their execution	03

Integrates cross-cutting issues					
Prerequisite: A foundational understanding of music theory and basic knowledge of Indian musical traditions is recommended. Familiarity with musical terminology and concepts will be advantageous for successful completion of the course.					
Course Objectives:					
1. By the end of the course, students will be equipped with a comprehensive understanding of the historical, theoretical, and practical aspects of Indian music, enabling them to recognize, analyze, and appreciate its diverse forms and traditions.					
2. They will also develop critical listening skills, cultural awareness, and a deeper appreciation for the artistic achievements of Indian musicians, poets, and composers across the ages.					
Course Outcomes:					
1. Gain a comprehensive understanding of the historical, theoretical, and practical aspects of Indian music.					
2. Develop a nuanced appreciation for the cultural diversity and artistic depth embedded within Indian musical traditions.					

3. Acquire fundamental skills in recognizing and interpreting ragas, talas, and musical compositions across various genres.
4. Cultivate the ability to critically analyze and contextualize the works of prominent poets, composers, and performers within the broader socio-cultural milieu.
5. Demonstrate proficiency in performing and/or appreciating a repertoire of Indian classical and light classical music, enhancing their creative expression and cultural literacy.

Sr. No.	Description	Relevance to Local / National / Global / Regional needs

Course Content:

Syllabus (Semester-III): -

Unit 1	The Pride of Indian Music - History and evolution of Indian Music - Significance of Indian music
Unit 2	History of Indian Music: Journey through millennia to explore the evolution of Indian music, tracing its roots from ancient Vedic chants to the sophisticated classical systems of today. Uncover the influences of various dynasties, invasions, and regional cultures that have shaped its trajectory
Unit 3	Definition & Details of Music: Delve into the essence of Indian music, where melody, rhythm, and emotion intertwine to create a tapestry of sound. Understand the intricate structures of ragas and talas, the heartbeats of Indian musical expression, and delve into the fascinating world of improvisation and ornamentation.

Unit 4	Know the Poets and Composers: Pay homage to the maestros whose lyrical prowess and compositional genius have immortalized Indian music. From the poetic mysticism of Kabir and Tulsidas to the melodic brilliance of Tyagaraja and Amir Khusrau, explore the diverse voices that echo through the annals of time.
Unit 5	Indian Folk Music: Embark on a sonic journey across the vibrant landscapes of India, where every region resonates with its own folk melodies and rhythms. Experience the soul-stirring ballads of the Bauls, the exuberant beats of Bhangra, and the haunting strains of Rajasthani folk music.
Unit 6	Basic Conception of Ragas: Unlock the secrets of ragas, the melodic frameworks that form the backbone of Indian classical music. Dive deep into their intricate patterns, mood associations, and time cycles, discovering the profound emotional and spiritual resonance that each raga evokes.
Unit 7	Raga-based Light Classical Songs: Immerse yourself in the enchanting world of light classical music, where the beauty of ragas finds expression in soulful thumris, playful dadras, and poignant kajris. Explore the lyrical intricacies and emotive nuances that adorn these timeless compositions, captivating hearts across generations.

Unit 1	The Pride of Indian Music
Unit 2	History of Indian Music 2.1: Where from it is originated 2.2 Abhang, Qawwali, Bhajan 2.3 Geet, Ghazal, Sufi
Unit 3	Definition & Details of Music 3.1 Swar, Sur, Sargam 3.2 Basic conception & application of Taals
Unit 4	Know the Poets and Composers
Unit 5	Indian Folk Music 5.1 Folk of Maharashtra 5.2 Folk of West Bengal, Punjab
Unit 6	Basic conception of Raagas
Unit 7	Raag based Light Classical Song

Year: Second
Semester: III

Course: CLASSICAL DANCE (KATHAK)
Course Code: 23SHD1015
Credits – 1

Course Code		Course Title		Category	
23SHD1116		Classical Dance-Kathak-1			
Contact hours per week			CA	FE	Credits
L	T	P			
1	0	2			
Focuses on			Skill development		
Integrates cross-cutting issues			Professional Ethics, Human Values		
Prerequisite:					
Students should have a basic understanding of dance terminology, footwork, and hand gestures (mudras). Additionally, some exposure to classical music concepts and rhythms would be beneficial for a deeper understanding of the course content.					
Course Objectives:					
1. Gain knowledge about various Indian classical dance forms, their historical background, and cultural significance. 2. Demonstrate proficiency in basic Kathak footwork patterns (Tatkars) and hand gestures (Mudras) through practice sessions. 3. Identify and understand common taals used in Kathak, such as Teen Taal, Ek Taal. 4. Recognize the importance of expressions (Abhinaya) in Kathak and understand how they enhance storytelling and emotional expression. 5. Gain knowledge about major Kathak gharanas, including their stylistic features, repertoire, and historical context.					
Course Outcomes:					

1. Understand the history and significance of Indian classical dance forms, particularly Kathak.
2. Demonstrate a basic understanding of Kathak's fundamentals, including footwork (Tatkar), hand movements (Hastak), and storytelling through expressions (Abhinaya).
3. Identify and perform basic Kathak mudras (hand gestures) accurately.
4. Recognize and execute basic rhythmic patterns (taals) used in Kathak, including Teen Taal, Jhap Taal, and Rupak Taal.
5. Appreciate the importance of expressions in Kathak and understand how they contribute to storytelling and emotive communication within the dance form.
6. Participate in a basic practical session, demonstrating competence in performing fundamental Kathak movements, mudras, and taals.
7. Develop a deeper appreciation for Indian classical dance forms and Kathak in particular, as an art form that combines physicality, rhythm, expression, and storytelling.

Sr. No.	Description	Relevance to Local / National / Global / Regional needs
1	Indian Dance Forms, History & Fundamentals of kathak	National
2	Basic practical session with Basic knowledge of Mudras	National
3	Basic conception of various Taals	National
4	Importance of expressions in kathak	National
5	Costumes of every Gharans theory	National

Course Contents:

Syllabus (Semester-III):-

Unit 1	Indian Dance Forms, History & Fundamentals of Kathak: ● Introduction to Indian Classical Dance Forms: ● Overview of major classical dance forms such as Bharatanatyam, Kathak, Odissi, etc. ● Historical background and cultural significance of Indian classical dance. ● History and Evolution of Kathak: ● Origins of Kathak and its development over centuries. ● Influence of Hindu and Muslim cultures on Kathak's evolution. ● Transition from temple and court dance to stage performances. ● Fundamentals of Kathak: ● Basic postures (Taal, Aamad) and movements (Chakkars, Tukdas) in Kathak. ● Understanding of bols (syllables) used in Kathak for rhythm and footwork. ● Introduction to Kathak's rhythmic cycles (Taals) and their importance in dance compositions.	(06 hours)

Course: FOLK DANCE
Course Code: 23SHD1017
Credits – 1

Course Code			Course Title		Category	
23SHD1118			Folk Dance-1			
Contact hours per week				CA	FE	Credits
L	T	P				
1	0	2				
Focuses on				Skill development		
Integrates cross-cutting issues				Professional Ethics, Human Values		

Prerequisite: To effectively learn the course, students should have basic dance skills and an understanding of rhythm, a keen interest in Indian cultural arts, and basic musical knowledge. Adequate physical fitness and willingness to learn new dance forms, musical instruments, and interdisciplinary art connections are essential. Additionally, creativity, expressiveness, and commitment to regular practice are necessary.

Course Objectives:

1. Understand Indian Dance Forms: Learn the meaning, definition, and various styles of Indian dance, including their history.
2. Acquire Technical Dance Skills: Master basic concepts of Taal, beats counting, and Asanyukta Hasta Mudras.
3. Refine Practical and Expressive Techniques: Practice and perfect folk dances from Maharashtra, Punjab, Gujarat, and West Bengal.
4. Analyze Technology's Impact on Dance: Understand the positive and negative effects of technology on Indian dance.
5. Appreciate Cultural and Historical Significance: Explore the application of folk dances in films and study the contributions of Bharat Ratnas to Indian dance.

Course Outcomes:

1. Understanding of Indian Dance Forms: Detailed knowledge of classical, semi-classical, and folk dances from different Indian states.

2. Technical Dance Proficiency: Strong foundation in Taal, beats counting, and Asanyukta Hasta Mudras.
3. Practical and Expressive Skills: Improved performance and expressive techniques through practical sessions.
4. Awareness of Technology's Impact: Understanding of the positive and negative effects of technology on Indian dance.
5. Cultural and Historical Appreciation: Deep appreciation of Indian dance culture, application in various contexts, and inspiration from Bharat Ratnas' contributions.

No.	Description	Relevance to Local / National / Global / Regional needs
1	Introduction – Meaning & definition of Art, Dance.	National
2	Basic knowledge of Mudras	National
3	Folk Dance of India- Gujarat, West Bengal	National
4	Application of expression/ Body movements Folk Dance – Tribal, Ritual, etc.	National
5	Application of Folk Dance	National

Course Contents :

Unit 1	Introduction to Art and Dance: Meaning and definition of Art and Dance. Various Dance Styles of India: Overview of classical, semi-classical, and folk dance styles. Origin and History of Indian Dances: Historical background and information on different dance styles of India.	(06 hours)
Unit 2	Basic Knowledge: Taal and Beats Counting (4, 8, 16, 32 Beats). Basic knowledge of Mudras: Names, Uses Applications (Asanyukta Hasta Mudra)	(06 Hours)
Unit 3	Folk Dance of India: Maharashtra: Types, theory, steps. Punjab: Types, theory, steps. Gujarat: Types, theory, steps. West Bengal: Types, theory, steps.	(06 Hours)

Unit 4	- Application of expression - Application of Body movements - Technology in India – Good and Bad effect of technology, in Indian Dance - Folk Dance – Tribal, Ritual, etc.	(06 Hours)
Unit 5	Application of Folk Dance: In films, all over, and state-wise	(06 hours)

Course Objectives: -

India is a land of varied cultures and traditions. Folk dances are performed to express joy and festivity. Folk dances are important because they help keep a culture alive. Folk dances are performed from hundreds of years, keeping that tradition alive. Folk dances are important to preserve the culture and pass it on to the next generation. Contact hours per week			CA	FE	Credits
L	T	P			
1	0	2	100	NA	2
Focuses on			Skill development		
Integrates cross-cutting issues					
Prerequisite: Candidates having interest in learning a Keyboard from hobby/career aspects and explore globally. Candidates having completed Keyboard-1 (Preliminary) course.					
Course Objectives: 1. Analyze the functions and settings of a keyboard instrument, including key layout and navigation. 2. Demonstrate proficiency in identifying and playing keyboard notes in the CDEFG notation. 3. Master various types of chromatic scales, including right and left-hand techniques. 4. Develop skills in playing the C major scale with both hands, focusing on accuracy and coordination. 5. Practice scale exercises and songs to enhance keyboard technique and musical fluency.					

Course Outcomes:

1. Apply advanced keyboard techniques, including scale exercises and song practice, to improve dexterity and precision.
2. Integrate right and left-hand coordination through practice sessions focusing on C major lessons and scale exercises.
3. Demonstrate proficiency in playing scales and chords with precision and rhythm using a metronome.
4. Utilize chord progressions and shifting techniques to enhance musical expression and dynamics.
5. Analyze and apply scale and chord theory to understand the structure and composition of keyboard music.

Sr. No.	Description	Relevance to Local / National / Global / Regional needs
1	Understanding Keyboard Functions and Settings	Global
2	Scale Exercise and song Practice	Global
3	Developing Hand Coordination and Musical Fluency	Global
4	Scale and Chords Theory and song Practice	Global
5	Mastering Chord Progressions and Rhythmic Techniques on Keyboard	Global

Course Contents:

Unit 1	Understanding Keyboard Functions and Settings - Understanding Keyboard Functions and Settings - Learning Keyboard Notes: CDEFG and Beyond - Comprehensive Chromatic Lessons - Mastery of C Major Scale for Both Hands	hours
Unit 2	Scale Exercise and song Practice - Coordinated Practice of C Major with Both Hands - C Major Exercises: 2, 3, and 4-Note Patterns - Introduction to a Simple C Major Melody - Metronome-Assisted Scale Practice with Rhythmic Variations	hours

Unit 3	Developing Hand Coordination and Musical Fluency - Coordinated Practice of C Major with Both Hands - C Major Exercises: 2, 3, and 4-Note Repetitions - Metronome and Rhythm Practice with Scale Sequences (CC, DD, EE, etc.) - Minor Chord Progressions: A minor, B minor, C minor, etc. - Introduction to a Simple A Minor Song	hours
Unit 4	Scale and Chords Theory and song Practice - Understanding Scale Theory - Notable Songs in the A Minor Scale - Exploration of the Five-Octave Scale	hours
Unit 5	Mastering Chord Progressions and Rhythmic Techniques on Keyboard - Enhancing Chord Shifting Skills with Metronome and Beat Variations - Progressive Chord Practice: Major and Minor Chords with Rhythmic Variation - Comprehensive Training in Major and Minor Chord Progressions with Rhythm - Application of C Major Chord Progressions in Basic Songs and Melodies - Exploring Broken Chords and their Application in Musical Compositions - Hands-on Practice with Keyboard's Automatic Chord Accompaniment (ACMP) Function	hours

Syllabus for Instrumental Music (Tabla)

Semester: III

Course: Instrumental Music (Tabla)

Course Code: 23SHD1021

Credits – 1

Course Code		Course Title		Category	
23SHD1122		Instrumental Music (Tabla)			
Contact hours per week			CA	FE	Credits
L	T	P			
1	0	2			
Focuses on			Employability, Skill Development		
Integrates cross-cutting issues			Environment & Sustainability		
Prerequisite: Candidates having interest in learning music					
Course Objectives: 1. Analyze the historical development and significance of Tabla, incorporating fundamental syllables, hand positioning, and letter combinations. 2. Synthesize basic syllables from both hands, integrating them into structured practice sessions for skill enhancement. 3. Evaluate different Taals such as Teentaal and Dadra, grasping their rhythmic complexities including Laya, beats, and rhythm variations. 4. Explore advanced rhythmic patterns within Bhajani Taal, incorporating and executing simple laggis proficiently within Dadra and Bhajani compositions. 5. Apply effective techniques and strategies for Riyaz, maximizing practice efficiency and skill development. 6. Implement Tihai techniques in Teentaal compositions, emphasizing mastery of Chatashra Tihai for enhanced rhythmic expression.					

Course Outcomes:

After studying the course, the learners will be able to

1. Upon completion of the course, students will be able to articulate the historical evolution and cultural significance of Tabla through critical analysis and discussion.
2. Students will demonstrate proficiency in executing basic syllables from both hands, integrating them creatively into practice sessions to enhance their Tabla playing skills.
3. Through practical application and performance assessments, students will display an understanding of different Taals, effectively incorporating variations in Laya, beats, and rhythm.
4. Students will showcase mastery in executing Bhajani Taal and integrating simple laggis within Dadra and Bhajani compositions, showcasing their ability to adapt to different rhythmic structures.
5. By applying various Riyaz techniques and strategies, students will exhibit improved practice habits and skill development, leading to increased proficiency in Tabla playing.
6. Students will demonstrate competency in executing Tihai techniques within Teentaal compositions, showcasing their ability to create rhythmic embellishments and variations for enhanced musical expression.

Course Description:

Sr. No.	Description	Relevance to Local / National / Global / Regional needs
1	Exploring the Evolution and Background of Tabla: Understanding Fundamental Syllables, Left and Right Hand Positioning, and Basic Combinations of Letters.	Global
2	Initiating with the Foundation: Learning Basic Syllables from Both Hands and Integrating them into Practice Sessions.	Global
3	Embarking on the Journey of Taal: Introduction to Teentaal, Dadra, Grasping Laya, Beats, and Rhythm.	Global
4	Delving Deeper: Exploring Bhajani Taal, Incorporating Simple Laggis within Dadra and Bhajani.	Global
5	Mastering the Art of Riyaz: Techniques and Strategies for Effective Practice.	Global
6	Elevating the Composition: Tihai Techniques in Teentaal Compositions, Emphasizing Chatashra Tihai.	Global

Course Contents :

Unit 1	Exploring the Evolution and Background of Tabla: • Historical overview of tabla and its significance in Indian classical music. • Evolution of tabla from its origins to modern times. • Introduction to tabla construction and materials. • Notable tabla players and their contributions to the art form.	hours
Unit 2	Foundation: Learning Basic Syllables: • Understanding the basic bols (syllables) of tabla: "Ta", "Na", "Tin", "Dha", "Dhin", "Ge", etc. • Left hand positioning (bayan) and right hand positioning (dayan). • Practicing basic bols individually and in combination. • Introduction to theka (basic rhythm pattern) and its variations.	hours
Unit 3	Embarking on the Journey of Taal: • Introduction to different taals (rhythmic cycles) such as Teentaal (16 beats), Dadra (6 beats), etc. • Understanding laya (tempo) and its importance in tabla playing. • Practicing different taals with variations in laya. • Emphasis on maintaining consistency and clarity in beats.	hours
Unit 4	Delving Deeper: Exploring Bhajani Taal: • Introduction to Bhajani Taal (8 beats) and its characteristics. • Incorporating simple laggis (combinations of bols) within Dadra and Bhajani. • Practice sessions focusing on smooth transitions between bols and maintaining the rhythm.	hours
Unit 5	Mastering the Art of Riyaz: • Techniques for effective practice sessions, including warm-up exercises and drills. • Strategies for improving hand coordination, speed, and precision. • Importance of regular and disciplined practice in mastering tabla playing.	hours
Unit 6	Elevating the Composition: Tihai Techniques: • Introduction to tihai (repetitive rhythmic patterns) and its significance in tabla compositions. • Emphasizing Chatashra Tihai (three-part rhythmic patterns repeated four times).	

	- Practice sessions focusing on incorporating tihai techniques into Teentaal compositions. - Understanding the role of tihai in enhancing the complexity and richness of tabla performances.	
--	---	--

Course Code	23SHD1021			
Course Title	Instrumental Music (Tabla)			
Teaching Scheme	L	T	P	Credits
	0	2	0	2
Total Teaching hrs.	30 _{hours}			
Pre-requisites: Candidates having interest in learning music.				
Course Objectives: 1. To Understand the Rhythm from daily routine life & from Nature. 2. To develop the skills of playing Tabla and understand the music through laya/ beats and Taal. 3. It helps to keep ourselves peace /calm and experience meditation through this practice.				

Course Outcomes: After studying the course, the learners will be able to

1) History & Information about Tabla/ Daya – Dagga/ Baya

2A) Tabla/ Daya – Dagga/ Baya - Playing method - Sitting while playing the Tabla - keeping the instrument and the method of holding fingers on it.

2B) Detailed information about how to play - Tabla, Dagga alphabets/ letters

(1) Dagga's letters and their practice

(2) Tabla letters and their practice

(3) Letters which are played simultaneously on Tabla and Dagga & about their practice.

(4) Tabla language - words and their practice

3A) Taal & Thekas - Information and Playing -

(1) Dadra (6 beat Taal), (2) Teental (16 beat Taal), (3) Bhajani (8 beat Taal)

3B) To know the concepts Laya, Taal, Theka

4) Riyaj Techniques

5) Chatustra Tihais & compositions in Teentaal

Course Description: Learning the art of music brings happiness. A hobby is cultivated for oneself. When you practice music while working in your field, you get a different identity.

Music, like any other subject, can lead to a great career, which requires consistency in art education & hard work.

Course Contents:

Unit No.	Topics	Hours
1	Theory-History of Tabla/ Basic Letters/ Left hand & right-hand position, Basic letters from Righth and also from left hand.	6

2	Both hands combine letters, Basic practice session phrases, Introduction of basic Taal – Teentaal, Dadara, Laya, Beats and rhythm	6
3	Bhajni Taal and simple laggis in Dadra and Bhajani.	6
4	Techniques of Riyaz.	6
5	Tihai in Teental compositions/ ChaturastraTihai in Teentaal	6
Total:		30 hrs

III-SEMESTER TABLA SESSION PLANNING 1

Session= 2 Hour

Session	Topic	Assignments	Hrs.
1	Introduction of basic Tablabol	Types Instruments and classification	2
2	Introduction of basic Tablabol and riyaz	Information of percussion instruments	2
3	Techniques of riyaz	BharatratnaSangeetkar	2
4	History of Tabla	BharatratnaSangeetkar	2
5	Riyaz of right hand, left hand and combined letters	Autobiography	2
6	Introduction to small phrases	Information about method of making Tabla	2

7	Introduction to joint letters and riyaz	Schools of Tabla	2
8	Introduction to Tritaal in detail	Importance of percussion instruments in music	2
9	Introduction to taalKeharwa in detail and riyaz	Instruments used in film music	2
10	Introduction to taal Dadra and riyaz of previous taal	Music directors and their contribution in film music	2
11	Introduction of Bhajanitaal and riyaz of previous taal	Various Percussionists	2
12	Introduction to simple laggis in Keharwa and Bhajanitaal	History of Tablagharanas	2
13	Introduction of Tihai	Presentation	2
14	Techniques of riyaz of various bol	Presentation	2
15	Riyaz Session	Presentation	2

Total: 30 Hours

- 2) Attend live music concerts.

MIT-ADT
UNIVERSITY
PUNE, INDIA

A Leap Towards World Class Education

MIT ADT University, Pune
School of Holistic Development
Instrumental Music (Tabla)

Year: Second

Semester: IV

Course: Instrumental Music (Tabla)
Course Code: 23SHD1022

Credits – 1

Course Code		Course Title		Category	
23SHD1123		Instrumental Music: Tabla-2			
Contact hours per week			CA	FE	Credits
L	T	P			
1	0	2	100	NA	2
Focuses on			Employability, Skill development		
Integrates cross-cutting issues			Environment & Sustainability		
Prerequisite: Prior knowledge of basic tabla techniques and familiarity with fundamental rhythmic concepts in Indian classical music.					

Course Objectives:

1. Analyze the techniques employed by renowned tabla artists in their performances.
2. Evaluate the mastery of Tirkit and Dhir Dhir techniques through practical application and performance.
3. Investigate the rhythmic intricacies of Taals like Rupak and Zaptaal, including their historical significance and contemporary usage.
4. Synthesize knowledge of Matra, Tihai, Laya, and Beat Structures to create rhythmic compositions and improvisations in tabla Bandish.
5. Examine the historical evolution and cultural impact of different tabla Gharanas, alongside understanding the technical aspects of tabla construction.
6. Critically analyze the Rela compositions within the Teentaal framework, exploring variations and stylistic nuances.
7. Design and execute complex rhythmic patterns within the framework of Kehrava Taal, incorporating Laggi patterns for artistic expression.

Course Outcomes:

1. Students will be able to assess and appreciate the diverse approaches and contributions of renowned tabla artists to the tabla tradition.
2. Students will demonstrate proficiency in executing Tirkit and Dhir Dhir techniques with precision and control, both individually and in ensemble settings.
3. Students will develop the ability to perform and interpret compositions in Rupak and Zaptaal, showcasing rhythmic fluency and musical sensitivity.
4. Students will create original tabla Bandish compositions integrating Matra, Tihai, Laya, and Beat Structures, reflecting an understanding of rhythmic principles.
5. Students will gain a comprehensive understanding of tabla Gharanas and construction techniques, enabling them to contextualize their performance practice within historical and cultural frameworks.
6. Students will analyze and deconstruct Rela compositions within Teentaal, demonstrating a nuanced understanding of rhythmic variation and improvisation.
7. Students will exhibit proficiency in executing complex rhythmic patterns in Kehrava Taal, incorporating Laggi patterns creatively to enhance musical expression and dynamics.

Course Description:

Sr. No.	Description	Relevance to Local / National / Global / Regional needs
1	Renowned Tabla Artists and Their Contributions	Global
2	Mastery of Tirkit and Dhir Dhir Techniques	Global
3	Exploring Taals: Rupak and Zaptaal	Global
4	Understanding Matra, Tihai, Laya, and Beat Structures in Tabla Bandish	Global
5	Gharana Legacy and Tabla Construction Insights	Global
6	Unraveling Rela in Teentaal	Global
7	Delving into Kehrava Taal and Laggi Patterns	Global

Course Contents :

Unit 1	Renowned Tabla Artists and Their Contributions: - Introduction to legendary tabla artists such as Ustad Zakir Hussain, Pandit Anindo Chatterjee, and Ustad Alla Rakha. - Exploration of their unique styles, techniques, and contributions to the tabla tradition. - Listening sessions featuring recordings of their performances to understand their artistry.	hours
Unit 2	Mastery of Tirkit and Dhir Dhir Techniques: - Detailed explanation and demonstration of Tirkit (quick triplet strokes) and Dhir Dhir (slow, sustained strokes) techniques. - Practice exercises focusing on developing control and precision in executing these techniques. - Integration of Tirkit and Dhir Dhir into rhythmic compositions to enhance dynamics and expression.	hours
Unit 3	Exploring Taals: Rupak and Zaptaal: - Introduction to Rupak Taal (7 beats) and Zaptaal (10 beats) and their characteristic patterns. - Practice sessions to familiarize students with playing Rupak and Zaptaal compositions. - Emphasis on understanding the unique groove and feel of each taal.	hours
Unit 4	Understanding Matra, Tihai, Laya, and Beat Structures: - In-depth study of matra (beats), tihai (repetitive rhythmic patterns), laya (tempo), and beat structures in tabla bandish (compositions). - Analysis of different laya variations and their impact on the overall feel of the performance. - Practical exercises focusing on counting and maintaining rhythmic precision within various compositions.	hours

Unit 5	Gharana Legacy and Tabla Construction Insights: • Exploration of different tabla gharanas (schools) such as Delhi, Ajrada, and Farukhabad, and their stylistic characteristics. • Insights into tabla construction, including materials used, tuning techniques, and craftsmanship. • Understanding the influence of gharana traditions on tabla playing styles and repertoire.	hours
Unit 6	Unraveling Rela in Teentaal: • Introduction to Rela, a fast and intricate rhythmic improvisation, in the context of Teentaal compositions. • Breakdown of Rela patterns and techniques, including variations in speed and dynamics. • Practice sessions focusing on developing fluency and creativity in playing Rela.	
Unit 7	Delving into Kehrava Taal and Laggi Patterns: • Introduction to Kehrava Taal (8 beats) and its variations. • Exploration of laggi patterns (flourishes and embellishments) within Kehrava Taal compositions. • Practice exercises to master the fluidity and coordination required for playing laggi patterns effectively.	

Course Code	23SHD1022			
Course Title	Instrumental Music (Tabla)			
Teaching Scheme	L	T	P	Credits
	0	2	0	2
Total Teaching hrs.	30 hours			
Pre-requisites: Candidates having interest in learning music.				
Course Objectives: 1. To Understand the Rhythm from daily routine life & from Nature. 2. To develop the skills of playing Tabla and understand the music through laya/ beats and Taal. 3. It helps to keep ourselves peace /calm and do meditation experience through this practice				
Course Outcomes: After studying the course, the learners will be able to 1) Information of great artist of Tabla 2) Tirkit and Dhir Dhir Practice 3) Taal Rupak and Zaptaal 4) Matra/ Tihai/ Laya/ Beats/ Poetry in Bandish of Tabla 5) Gharana Information/ Tabla parts information making process. 6) Rela in Teentaal. 7) Kehrava Taal and Laggis.				

Course Description: Learn the Spanish language to study or work abroad. This course helps learners get started with the understanding of common words and phrases as well as basic grammar, pronunciation, and conversation skills, allowing them to communicate in everyday situations according to the level A1 as described in the DELE (Diplomas de Español como Lengua Extranjera)

This course is offered through an innovative language learning methodology that lets Indian speakers develop their Japanese language skills while they have fun practicing everyday situations.

Course Contents:

Unit No.	Topics	Hours
6	Information of great artist of Tabla	4
7	Tirkit and Dhir Dhir Practice	4
8	Taal Rupak and Zaptaal	4
9	Matra/ Tihai/ Laya/ Beats/ Poetry in Bandish of Tabla	4
10	Gharana Information/ Tabla parts information making process.	4
11	Rela in Teentaal.	4
12	Kehrava Taal and Laggis.	6
	Total:	30 hrs

IV-SEMESTER TABLA SESSION PLANNING

1 Session= 2 Hour

Session	Topic	Assignments	Hrs.
1.	Explain definitions and previous Riyaaaz	Assignment on definitions	2
2.	Explain definitions and previous Riyaaaz	Various forms of Indian music	2
3.	Riyaaaz of previous Taalas	Various forms of Indian music in detail	2
4.	Detail introduction of Taal Rupak and Zaptaal	Assignment on legendary Tabla artist and their contribution in music	2
5.	Techniques of playing Teentaal in fast tempo	Importance of Rhythm	2
6.	Techniques of playing Taal in different speeds	Connectivity between taal and music	2
7.	Introduction of Vilambit Tritaal and its Riyaaaz	Film music and rhythm patterns	2
8	Riyaaaz Session of previous and latest Taals	Assignment on musicians	2
9	Riyaaaz of Tirakita Dhirakita phrases and its techniques	Assignment on musicians	2
10	Recite Taals on Ekpat, Duppat and Riyaaaz of previous bol	Outstanding contribution in Indian music by Honourable Dr.VishwanathKarad(Formation of VSKA)	2
11	Riyaaaz of 3rd semester practical material	Music events in MIT ADTU	2
14.	Presentation	Detail information of VSKA	2

15	Introduction of Quayda in Tritaal	Visit to VSKA and detail paperwork	2

Semester: III

Course: Guitar
Course Code: 23SHD1023
Credits – 1

Course Code		Course Title		Category	
23SHD1023		Instrumental Guitar-1	Music: Acoustic		
Contact hours per week			CA	FE	Credits
L	T	P			
0	0	1	100	NA	1
Focuses on			Skill development		
Integrates cross-cutting issues					
Prerequisite: Students having interest in learning a guitar from career aspects and explore globally as guitarist or musician.Students having a basic and advanced level of proficiency in Guitar.					
Course Objectives: 1. Analyze the principles of right hand technique for playing open strings on the guitar. 2. Evaluate the structure and application of the chromatic scale across the fretboard. 3. Synthesize knowledge of scale types, positions, tuning methods, and theoretical concepts within the framework of the C Major scale. 4. Design practical exercises to develop guitar techniques, including tuning proficiency and rhythmic precision.					
Course Outcomes: 1. Demonstrate proficiency in executing various right hand techniques, such as fingerpicking and strumming, on open strings.					

2. Construct and perform chromatic scale patterns across the fretboard, showcasing understanding and fluency in navigating musical intervals.
3. Through application and analysis of scale types, positions, and theoretical principles, students will be able to construct, play, and transpose melodies and chord progressions in the key of C Major.
4. Integrate various guitar techniques into their playing, utilizing exercises to improve dexterity, accuracy, and musical expression, while also applying tuning methods and playing along with different song rhythms

Course Description :

No.	Description	Relevance to Local / National / Global / Regional needs
1	Introduction to Guitar	Global
2	Fingerpicking Patterns	Global
3	Strumming Techniques	Global
4	Hybrid Picking	Global
5	Understanding the Fretboard: Exploring the Chromatic Scale	Global
6	Mastering C Major: Scale Types, Positions, Tuning, and Theory	Global
7	Guitar Techniques: Practical Exercises, Tuning, and Song Rhythms	Global

Course Contents :

Unit 1	Introduction to Guitar 1. Overview of different right hand techniques (e.g., fingerstyle, picking, strumming). 2. Explanation of hand positioning and movement.	hours
Unit 2	Fingerpicking Patterns 1. Learning basic fingerpicking patterns (e.g., Travis picking, arpeggios). Practice exercises to develop finger independence and control.	hours
Unit 3	Strumming Techniques 1. Understanding various strumming patterns (e.g., downstrokes, upstrokes, syncopation). - Application of strumming techniques in different musical styles.	hours

Unit 4	Hybrid Picking Introduction to hybrid picking technique. - Exercises to incorporate hybrid picking into playing open strings.	hours
Unit 5	Understanding the Fretboard: Exploring the Chromatic Scale 1. Fretboard Layout and Note Identification: - Understanding the layout of the guitar fretboard. - Identifying notes on different strings and frets. 2. Introduction to the Chromatic Scale: - Definition and structure of the chromatic scale. - Practice exercises to play the chromatic scale in different positions. 3. Interval Training: - Learning about intervals within the chromatic scale. - Ear training exercises to recognize intervals by ear. 4. Fretboard Navigation: - Techniques for navigating the fretboard using the chromatic scale. - Application of the chromatic scale in improvisation and soloing.	hours
Unit 6	Mastering C Major: Scale Types, Positions, Tuning, and Theory 1. C Major Scale: - Structure and intervals of the C Major scale. - Learning different positions and fingerings for the C Major scale. 2. Scale Types: - Introduction to major, minor, and pentatonic scales. - Practice exercises to play these scales in the key of C Major. 3. Tuning Methods: - Standard tuning and alternate tuning methods. - Tuning exercises and tips for maintaining proper tuning. 4. Music Theory Concepts: - Understanding chord construction within the C Major scale. - Introduction to harmonization and chord progressions.	hours
Unit 7	Guitar Techniques: Practical Exercises, Tuning, and Song Rhythms	hours

Course Code	23SHD1023			
Course Title	Guitar			
Teaching Scheme	L	T	P	Credits
	1	1	0	2
Total Teaching hrs.	30 hours			
Pre-requisites: 1) Students having interest in learning a guitar from career aspects and explore globally as guitarist or musician. 2) Students having a basic and advanced level of proficiency in Guitar.				
Course Objectives: 1) String Instruments help develop hand-eye coordination. 2) Also, certain techniques like learning a proper bow hold helps contribute to flexibility and dexterity in the fingertips. 3) Playing posture is an important aspect of learning a string instrument and can improve sitting / standing posture in everyday life too. 4) It is one of the best parts of doing meditation. 5) Improves Your Memory. 6) Enhances Your Creativity. 7) Teaches You Discipline. 8) Develops Social Skills & Teamwork. 9) Improves Your Math Performance. 10) Enhances Your Coordination. 11) Increases Your Confidence & Self Esteem. 12) Sharpens Your Concentration				
Course Outcomes: After studying the course, the students will be able to develop finger dexterity and strumming abilities in order to begin making music. Students will perform exercises such as playing through scales, chord charts, strumming patterns and rhythms and they will practice these rhythms independently and in groups. Also, students can perform on professional platforms after being well trained and practiced.				
Course Description: Learning Guitar improves Memory, Intelligence and Behaviour. It Teaches You Discipline. It Increases your Self Esteem and Confidence. Get Better Grades and Test Scores. It Enhances Your Creativity and Self Expression.				
Studies have found that learning a musical instrument does make you smarter. The cognitive skills you can develop while learning guitar will benefit other areas of your life. The reason playing guitar makes you smarter is thanks to what is known as brain plasticity.				
Course Contents:				
Unit No.	Topics			Hours

1	Guitar Introduction 1) Fret board info and open strings notes, 2) Holding the guitar & Plectrum 3) rect Posture.	6
2	Open Strings lessons – Right Hand 1.Down & Up stroke, 2.Alternate stroke Practice 3. Finger Exercise	4
3	Fret Board lessons Chromatic scale 1.Four finger Exercise	4
4	C Major Scale, Scale types, Position, tune and theory	8
5	Guitar Techniques, Exercise Formula, Tune and song with beats	8

Co-curricular & Extra Curricular Activities

- 1) Organizing a jamming session to give an impetus to the enthusiast learners.
- 2) Organizing an event (International cultural Festival) at MIT ADT Persona Fest**

Course Description:

No.	Description	Relevance to Local / National / Global / Regional needs
1	Introduction to chords	Global/National
2	Basic Chords Strumming	Global/National
3	Chords Different Positions	Global/National
4	Chord Progression	Global/National
5	Barre Chords	Global/National

Course Contents :

Unit 1	Introduction to Chords	06 hours
	1. Understanding Chords:	
	- Definition of chords and their role in music. - Basic components of chords: root note, third, fifth. - Different types of chords: major, minor, seventh, etc. - Demonstration of chord structures on musical notation and diagrams.	
	2. Chord Construction:	
	- How chords are constructed from scales. - Intervals and their role in chord construction. - Using intervals to create different chord qualities (e.g., major, minor, diminished, augmented).	
Unit 2	3. Ear Training:	04 hours
	- Developing the ability to recognize and identify chords by ear. - Ear training exercises to distinguish between different chord qualities.	
	4. Application:	
	- Practical applications of chords in playing instruments (e.g., guitar, piano, ukulele). - Understanding chord symbols and chord charts.	
	Basic Chords Strumming	
Unit 2	1. Strumming Basics:	04 hours
	- Introduction to strumming patterns. - Basic strumming techniques (e.g., downstrokes, upstrokes, alternating strumming).	
	2. Rhythm and Timing:	

	- Understanding rhythm notation (e.g., quarter notes, eighth notes). - Developing a sense of timing and rhythm while strumming chords. 3. Basic Chord Progressions: - Introduction to simple chord progressions. - Practice strumming along with common chord progressions. 4. Dynamic Strumming: - Incorporating dynamics (volume variation) into strumming. - Using accents and muted strums for rhythmic effect.	
Unit 3	Unit 3- Chords Different positions Open Chords vs. Barre Chords: - Explanation of open chords (played near the nut) and barre chords (played using a finger to cover multiple strings). - Comparison of sound and application of each type of chord. Learning Different Positions: - Learning multiple positions for common chords (e.g., C major, G major) across the fretboard. - Practice transitioning between different chord positions smoothly. Chord Inversions: - Introduction to chord inversions and their use in creating smoother chord progressions. - Practice playing chords in different inversions.	04 hours
Unit 4	Unit 4- Chord Progression 1. Understanding Progressions: - Explanation of chord progressions and their role in songwriting and composition. - Analysis of common chord progressions in various musical genres. 2. Creating Progressions: - Techniques for creating original chord progressions. - Experimenting with chord substitutions and variations. 3. Application in Songs: - Analysing chord progressions in popular songs. - Learning to play songs by following chord progressions.	10 hours
Unit 5	Unit 5- Barre Chords 1. Introduction to Barre Chords: - Explanation of barre chords and their advantages. - Understanding the barre technique and finger positioning. 2. Developing Finger Strength: - Exercises for building finger strength and dexterity required for playing barre chords. - Tips for overcoming common challenges with barre chords. 3. Playing Songs with Barre Chords: - Learning to play songs that utilize barre chords. - Practice transitioning between open chords and barre chords within songs.	06 hours

- 13)String Instruments help develop hand-eye coordination.
- 14)Also, certain techniques like learning a proper bow hold helps contribute to flexibility and dexterity in the fingertips.
- 15)Playing posture is an important aspect of learning a sting instrument and can improve sitting / standing posture in everyday life too.
- 16)It is one of the best part of doing meditation.
- 17)Improves Your Memory.
- 18)Enhances Your Creativity.
- 19)Teaches You Discipline.
- 20)Develops Social Skills & Teamwork.
- 21)Improves Your Math Performance.
- 22)Enhances Your Coordination.
- 23)Increases Your Confidence & Self Esteem.
- 24)Sharpens Your Concentration.

Course Outcomes:

After studying the course, the students will be able to **develop the finger dexterity and strumming abilities in order to begin making music.**

Students will perform exercises such as playing through scales, chord charts, strumming patterns and rhythms and they will practice these rhythms independently and in groups.

Also, students can perform on professional platforms after being well trained and practiced.

Course Description: Learning Guitar improves Memory, Intelligence and Behaviour.

It Teaches You Discipline.

It Increases your Self Esteem and Confidence.

Get Better Grades and Test Scores.

It Enhances Your Creativity and Self Expression.

Studies have found that learning a musical instrument does make you smarter. The cognitive skills you can develop while learning guitar will benefit other areas of your life. The reason playing guitar makes you smarter is thanks to what is known as brain plasticity.

Course Contents:

Unit No.	Topics	Hours
6	Introduction to Chords	6
7	Basic Chords Strumming Broken Chords difference rhythm patterns	4
8	Chords Difference Positions	4
9	Chord Progression	10
10	Chords Mute with Rhythm	
11	Barre Chords Major & Minor chords practice with songs	6
12	Famous songs on guitar with chords and intro music piece	
Total:		30 hrs

MIT ADT University, Pune
School of Holistic Development

Year: Second
Semester: III

Course: Drawing & Painting
Course Code: 23SHD1025
Credits – 1

Course Outcomes:

1. Foundations of Drawing and Painting:
 - Create artworks that effectively utilize the elements of Line, Form, Color, Tone, Texture, and Space to convey artistic concepts.
 - Critique and provide feedback on peers' artworks regarding their use of foundational elements.
2. Composition Principles:

- Develop original compositions that demonstrate mastery of Proportion, Rhythm, Dominance, Harmony, Unity, and Balance.
 - Analyze and deconstruct existing artworks to identify and evaluate composition principles.
3. Mediums and Techniques Exploration:
 - Produce artworks showcasing proficiency in selected mediums and techniques, such as drawing, painting, and mixed media.
 - Experiment with innovative approaches to mediums and techniques to push artistic boundaries.
 4. Exploration of Early Indian Art:
 - Construct informed interpretations of early Indian artworks based on historical and cultural contexts.
 - Present research findings on specific aspects of early Indian art through written and oral presentations.
 5. Journey Through Buddhist Art:
 - Curate a digital exhibition showcasing the significance of Buddhist art sites in India.
 - Participate in discussions and debates exploring the socio-cultural impact of Buddhist art on contemporary Indian society.
 6. Celebrating Renowned Indian Artists:
 - Develop a portfolio of artworks inspired by the styles and themes of famous Indian artists.
 - Collaborate with peers to organize an art exhibition featuring works influenced by renowned Indian artists.

Course Description:

No.	Description	Relevance to Local / National / Global / Regional needs
1	Foundations of Drawing and Painting	Global
2	Composition Principles	Global
3	Mediums and Techniques Exploration	Global
4	Exploration of Early Indian Art	National
5	Journey Through Buddhist Art	National
6	Celebrating Renowned Indian Artists	National

Course Contents :

Unit 1	Basic Study of Drawing and Painting Elements - Line - Form - Colour - Tone - Texture - Space	06 hours
Unit 2	Principles of Composition - Proportion - Rhythm - Dominance - Harmony - Unity - Balance	06 hours
Unit 3	Medium and Technique Exploring different mediums and techniques in drawing and painting	06 hours
Unit 4	Primitive Art with Reference to Indian Painting - Pre-historic painting - Indus valley - Jogimara	06 hours
Unit 5	Buddhist Art - Ajanta - Ellora - Sitanvasala - Badami - Elephanta - Bagh - Karle	03 hours
Unit 6	Famous Artists of India and Their Works Studying renowned Indian artists and their notable works	03 hours

Course Code 23SHD1025

Course Title Drawing & Painting

Teaching Scheme	L	T	P	Credits
	0	0	2	2

Total Course Teaching Hrs. 30 hours

Course Objectives:

1. To enable students to process and interpret the world creatively through art, fostering skills such as Creativity, Observation, Self-Expression, Focus, Discipline, Risk-taking, Communication, and Confidence.
2. To provide students with basic knowledge and exposure to concepts, theories, and practices in the field of Drawing & Painting, encouraging them to develop and share their own interests and skills in the subject.

Course Outcomes:

Course Outcomes: By the end of the course, students will be able to:

1. Demonstrate a basic understanding of art, drawing, and sketching using different mediums and techniques to express their own ideas and creativity.
2. Apply principles of composition such as Proportion, Rhythm, Dominance, Harmony, Unity, and Balance in their artwork.
3. Explore various mediums and techniques in drawing and painting, including oil, pastel, watercolor, and acrylic.
4. Analyze and appreciate primitive Indian art forms like Pre-historic painting, Indus valley art, Jogimara art, and Buddhist art.
5. Identify and discuss the works of famous artists, including M.F. Hussain and Raja Ravi Varma, and create artwork inspired by their styles.
6. Engage in activities that enhance their observational skills, color theory knowledge, and understanding of folk art traditions like Warli art.

Course Description: The course aims at providing fundamental knowledge and exposure to concepts, theories, and practices in the field of Drawing & Painting.

Course Contents: (Semester -III) (Unit Plan)

Semester: III

Course: Sculpture (Clay & Modelling)

Course Code: 23SHD1027

Credits – 1

Course Code	23SHD1027			
Course Title	Sculpture (Clay & Modelling)			
Teaching Scheme	L	T	P	Credits
	0	0	2	1
Total Course Teaching Hrs.	30 hours			

Pre-requisites: Participants must be willing to be a part of a vibrant artistic community to enhance their creativity in a more scientific manner.

Course Objectives:

The main objectives of the Sculpture (Clay & Modelling) course are to help participants:

1. process the world around them and express their interpretations in a creative way.
2. develop their abilities through this course, like creativity, observation, self-expression, focus, discipline, risk taking,
3. be a better & confident communicator

Course Outcomes:

After studying the course, students will be able:

1. to learn basic skills of drawing, sketching.
2. to review the basic principles of design and understand each principle more completely.
3. learn and use traditional methods of clay modelling, creative shapes, and how to decorate objects.
4. To build basic forms in clay.
5. draw and do sketching in details.

Course Description:

Students will learn the essential tools, its use/functionalities, and will be introduced to the sculpting workflow and concepts. Moreover, it is a practical oriented course in which the participants will have hands-on experience.

Course Contents:

Unit No.	Topics	Hours
1	Main topic: History of Indian Sculpture Sub topics (Elements of Art): • Line • Shape • Form • Texture • Color Methodology: Basic instructions and Task based Practice (Slide show, video presentation, and sketching). Material:	6 hrs.

	- Videos & PPTs (Bearded Man, Priest Man, Priest-King, dancing girl, Male Torso, Bull from Mohenjo-Daro, Mother Goddess, Seals: Seals of Pashupati Mahadeva) By the end of this unit, learners will be able to: - understand the fundamental elements of arts - get a detailed understanding of the basic elements of art (Dot, line, colour, shape, form, and texture) - know how artists use these elements in different ways in their work. - answer questions as they look carefully at paintings and sculpture to identify the elements and analyze how they are used by different artists.	
2	Main topic: Contemporary Indian Sculptor and their sculpture Sub topics (Elements of Art): Methodology: Task-based practice Material: Videos & PPTs (Lion Capital, Sarnath, Yakshas and Yakshinis, Sculpture of Ajanta Caves, Sculpture of Elora, & Elephanta Caves). By the end of this unit, learners will be able to- - demonstrate their understanding of the visual components of colour, form, line, shape, space, texture. - carry out a practical based task related to fundamentals of art.	6 hrs.
3	Main topic: History of Sculpture Sub topics: - Traditional Sculpture styles in India (Stone, Metal, Wooden, Terracotta sculpture) - Principal of design (Balance, Rhythm, proportion, Harmony) Methodology: Listening to information, instructions and participate in task-based practice Material: Videos, PPTs, and Sketching (Buddhist Art, Relief Sculpture, Gandhara Buddha sculpture, Trimurti Elephanta) By the end of this unit, learners will be able to- - review the basic principles of design and understand each principle more completely.	4 hrs.
4	Main topic: History of Sculpture Sub topics: - Tribal Sculpture of India - Dokra Sculpture - Wrought Iron Sculpture - Tribal wooden, metal, and stone sculpture. - Principal of design (Movement, Pattern, Unity) Methodology: Listening to information, instructions and participate in task-based practice	4 hrs.

	Material: Videos, PPTs, and Sketching By the end of this unit, learners will be able to- 1. review the basic principles of design and understand each principle more completely.	
5	Main topic: History of Sculpture Sub topics: - Famous sculpture artists & their creations - Principal of Design (Unity, Emphasis, Repetition) Methodology: Listening to information, instructions and participate in task-based practice Material: Videos, PPTs, and Sketching (Rakin karbaij, shankho Chowdhury, Amaranth Sehagal, & Dhanraj Bhagat) By the end of this unit, learners will be able to- 1. review the basic principles of design and understand each principle more completely.	5 hrs.
6	Main topic: 3D Model Making Sub topics: - Soap Carving - Introduction of 3D Methodology: Listening to information, instructions and participate in task-based practice Material: Different raw material and tools By the end of this unit, learners will be able to- - create geometrical shapes in clay like cube, cylinder, pentagon, cone etc. and arrange 3-d design on a base. - draw 3 rough sketches for 3D then turn one of their sketches in to a three dimensional - create a free standing 3D composed entirely of tooth pick or matchbox sticks and glue.	5 hrs.
Total:		30 hrs.
Learning Resources: <i>For the learning resources, kindly refer to the subsection (i.e., Materials) for each unit.</i>		
Reference books, web resources, web links, & research journals: The course instructors will share the specific lists of reference books, web resources, web links, and research journals in relation to each individual unit before the course starts.		
Evaluation / Assessment & Grading Scheme: Total Assessment will be out of 100 Marks of which Internal Assessment (Continuous assessment) carries 60 marks and external assessment carries 40 marks. Continuous Assessment (CA) 60 Marks & Jury 40 Marks		
Assignment-1		

Introduction of 3D, create geometrical shapes in clay like cube, cylinder, pentagon, cone and arrange on a base.

Course: Photography
Course Code: 23SHD1029
Credit – 1

Course Code		23SHD1029		
Course Title		Photography		
Teaching Scheme	L	T	P	Credits
	0	0	2	1
Total Course Teaching Hrs.		30 hours		
Pre-requisites: Participants must be willing to be a part of vibrant artistic community to enhance their creativity in a more scientific manner.				
Course Objectives: The main objectives of the Photography course are to help participants to: 1. understand how Photography can be an important means for people to communicate through images. 2. create an awareness about the fact that they are capable to handle any situation. 3. know that they can join any community to understand the nature of people and that contributes towards development of inter-personal and intra-personal skills.				
Course Outcomes: After studying the course, students will be able: 1. To know the basic principles of photography 2. To understand the use of different tools and techniques of a variety of photography types 3. To apply the learnt knowledge about photography in their real life to be a professional photographer				
Course Description: In this course, the participants will get briefing on the introduction and fundamentals of Photography and prepare themselves for creating their own exciting projects. The course is designed to make them confident and provide all the required knowledge as beginners to control the camera and make pictures that they will be proud to share. In a nutshell, the participants will learn principles, tips, and techniques for using the essential element of Light in Ambient/Natural settings and actually start shooting through lens.				
Course Contents:				
Unit No.	Topics			Hours
1	Main topic: Basic Photography Principles Sub topics: Rhythm, Balance, Harmony, Unity- Texture/Pattern/Tone, Line-Perspective, and Tone Perspective By the end of this unit, learners will be able to- 1. learn, understand, and discuss the basic principles of Photography.			5 hrs.
2	Main topic: Depth of Field Sub topics: Control with Focusing Point, Shutter & Aperture. By the end of this unit, learners will be able to- 2. learn, understand, and discuss depth of the field. 3. Reflect and analysis their own understanding of the Photography filed with help of questionnaire and revise their beliefs.			5 hrs.
3	Main topic: Introduction to camera Sub topics: About camera & how its development brief history, period of 18 th century up to digitalization in 20 th century, Pin whole /TLR/SLR/Digital SLR. By the end of this unit, learners will be able to-			5 hrs.

	1. Know the chronological history of the field and the key developments happened.			
4	Main topic: Camera tools and techniques Sub topics: the digital tools used in photography and key tips. By the end of this unit, learners will be able to- 1. know the basic as well as advanced tools and be able to apply all the techniques to handle them efficiently.	5 hrs.		
5	Main topic: Outdoor – Indoor Lights Sub topics: day-light photography, indoor photography, flash photography, lighting photo, filters, detail of megapixel, study shoot. The final project. By the end of this unit, learners will be able to- 1. understand and follow the instructions given in creating photography set using outdoor and indoor lights.	10 hrs.

Co-curricular & Extra Curricular Activities

MIT ADT University, Pune
School of Holistic Development

Year: Second
Semester: IV

Course: Photography
Course Code: 23SHD1030
Credit – 1

Course Code	23SHD1030			
Course Title	Photography			
Teaching Scheme	L	T	P	Credits
	0	0	2	1
Total Course Teaching Hrs.	30 hours			

Pre-requisites: Participants must be willing to be a part of vibrant artistic community to enhance their creativity in a more scientific manner.

Course Objectives:

The main objectives of the Photography course are to help participants to:

4. understand how Photography can be an important means for people to communicate through images.
5. create an awareness about the fact that they are capable to handle any situation.
6. know that they can join any community to understand the nature of people and that contributes towards development of inter-personal and intra-personal skills.

Course Outcomes:

After studying the course, participants will be able:

6. To know the advance developments in the field of photography and the variety of types
7. To understand the use of different tools and techniques of a variety of photography types
8. To apply the learnt knowledge about photography in their real life to be a professional photographer

Course Description:

In this course, the participants will get briefing on the introduction and fundamentals of Photography and prepare themselves for creating their own exciting projects. The course is designed to make them confident and provide all the required knowledge as beginners to control the camera and make pictures that they will be proud to share.

In a nutshell, the participants will learn principles, tips, and techniques for using the essential element of Light in Ambient/Natural settings and actually start shooting through lens.

Course Contents:

Unit No.	Topics	Hours
1	Main topic: Story telling Photography Sub topics: People/Crowd, History, Bazaar, etc. By the end of this unit, learners will be able to- 1. learn, understand, and get involved in Story telling Photography.	5 hrs.
2	Main topic: Architecture Photography Sub topics: Understanding of construction and structural weight in surrounding atmosphere By the end of this unit, learners will be able to- 1. learn, understand, and get involved in Architecture Photography.	5 hrs.
3	Main topic: Fashion Photography Sub topics: Surrounding anatomy and its nature of behaviour. By the end of this unit, learners will be able to- 1. learn, understand, and get involved in Fashion Photography.	5 hrs.
4	Main topic: Wildlife Photography Sub topics: The ethics and techniques of wildlife photography and its presentation. By the end of this unit, learners will be able to- 1. learn, understand, and get involved in Wildlife Photography.	5 hrs.
5	Main topic: Event Photography Sub topics: • The challenges, creative ways, and techniques of Event Photography and its presentation.	10 hrs.

	• Other photography types (Studio, sport, Product) • Other techniques (newspaper photo angle, news channel story wise angel, Photoshop, documentary film shoot, video editing) The final project. By the end of this unit, learners will be able to- 1. learn, understand, and get involved in Wildlife Photography.			
Total:		30 hrs.

Year: Second
Semester: III

Course: Architecture for Smart Living/Architectural
Sensibility-1

Course Code: 23SHD1031

Credits - 1

Course Code	23SHD1031				
Course Title	Architectural Sensibility-1				
Teaching Scheme	L	T	P	Credit	
	0	0	2	1	
Total Course Teaching Hrs.	30 hrs (16 weeks)				
Pre-requisites: Candidates having interest in various features of Architecture.					

Course Objectives:

The main objectives of the Architecture Sensitivity course are:

1. To understand the role of an architect and various stakeholders in building industry.
2. To understand the physical environment and its relation to nature.
3. To understand the aesthetic and spatial sensitivity in Architecture.
4. To introduce the various buildings by master architects.
5. To enable students to understand basic sustainable approach in Architecture.

Course Outcomes:

1. Students will be able to distinguish between the role of various stakeholders in building industry.
2. They will be able to state meaning and impact of physical environment.
3. They will be able to choose aesthetically pleasing elements for indoor and outdoor environments.
4. They will be able to identify buildings by various famous architects.
5. They will be able to identify sustainable materials and technologies in building industry.

Course Description: The course aims at providing fundamental knowledge and exposure to concepts, theories, and practices in the field of architecture and to facilitate students in appreciating the need/significance of architectural awareness.

Course Contents:

Un it No	Topics	Hours
1	Role of an Architect and various stakeholders Defining role of an architect Responsibility of client. Role of other stakeholders in the building industry such as, contractor, surveyors, project managers and so on.	6
2	Physical environment Defining Physical environment: built and unbuilt, indoor, and outdoor. Impacts of physical environment on the surrounding natural environment Ideations for integration of the indoor and outdoor.	6

3	Aesthetics and Spatial module Shapes, patterns, materials, and colours for aesthetically appealing interiors. Indoor lighting and ventilation for creating spatial dimension. Space setting for surrounding environments- sitout, plaza, gazebo, garden etc.	6
4	Famous buildings and their architects Introduction to buildings by Charles Correa, B.V. Doshi, Raj Rewal, Laurie Baker, Sanjay Puri, Sonam Wangchuk, Sanjay Mohe, Hafeez Contractor, Huzefa Rangwala (MuseLAB), Neelam Manjunath (Manasaram Architects), Rahul Mehrotra, Nari Gandhi.	6
5	Sustainable approach in Architecture Introduction to renewable energy resources. Use of Solar Energy in buildings. Recycling and reuse strategies in building industry Use of rainwater harvesting.	6
Total:		30
Learning Resources: The course instructors will share specific lists of reference books, web resources, weblinks, and research journals in relation to each individual unit before the course starts.

Course Code	23SHD1032			
Course Title	Architectural Sensibility-2			
Teaching Scheme	L	T	P	Credit
	0	0	2	1
Total Course Teaching Hrs.	30 hrs (16 weeks)			
Pre-requisites: Candidates having interest in various features of Architecture.				
Course Objectives: The main objectives of the Architecture Sensibility course are: 1. To understand the intricacies of Architecture 2. To understand the aesthetic and spatial sensitivity in Architecture 3. To introduce the various branches in architecture. 4. To enable students to understand contribution of architecture to their study area and vice-versa				

Course Outcomes:

1. Pattern and design ideation
2. Understanding the building strategies of various world famous buildings.
3. Project, pertaining to the inter-relation of architecture to the individual student's study area. Ex: students from Computer Science background can develop apps and software that can be used by architect for sketching, calculation of materials etc.

Course Description: The course aims at providing fundamental knowledge and exposure to concepts, theories and practices in the field of architecture and to facilitate students in appreciating the need/significance of architectural awareness.

Course Contents:

Unit No.	Topics	Hours
1	Identifying Patterns and Character study Understanding the relation between personality and character of people and designing as per requirement. Abstract and geometric pattern analysis.	6
2	Understanding the architecture of World famous buildings Study the architectural characteristics of famous buildings in the world like Burj Khalifa, Taj Mahal, Eiffel Tower, Colosseum etc.	6
3	Various aspect of Architecture Landscape Architecture, Urban and town Planning, Interior Design, Transportation planning, Green Building etc	6
4	Contribution of Architecture to individual branch/stream/school Aspects of architecture that will help the students to explore new avenues in their area of study	6
5	Contribution of individual branch/stream/school to Architecture Aspects of the student's study area that will help understand architecture better	6

Course Code: 23SHD1037
Credits – 1

1. Course Objective:-

To introduce design thought in students

To inculcate creativity

To give student the research, writing, and critical reasoning skills you need to effectively develop and share your ideas and concepts.

Syllabus (Semester-III):-

	Contents	Assignments	Hours
Unit-1	Introduction to Design History of Design in global&Indian context	Design as an activity and profession, timeline, milestones, Design in India, important designers	4 Hrs.
Unit-2	Design Specialisations Experience & Elements of Design	Design in various streams Design, Gestalt Principles,	6 Hrs.
Unit-3	Gestalt Laws and Design Design Thinking Process, tools, Design Research	Design methodology Brain storming, mind maps,& other tools	6 Hrs.
Unit-4	User-centric Design Geometry and Design	Research methodology, Persona and scenario tools, Fundamentals of Geometry, Introduction to photography	4 Hrs.
Unit-5	Fundamentals of Photography, Ergonomics and Design, Nature Inspired Design	Introduction to photography, Principles of ergonomics	5 Hrs.

Unit-6	Design for luxury, Design as cultural evolution	Principles of Biomimicry, Value addition through design, Design as cultural expression	5 Hrs.
---------------	---	--	---------------

Total- 30 Hours

III – SEMESTER - DESIGN SESSION PLANNING

1 session = 2 hrs.

Sess ion	Theory(30min.)	Assignments (90 min.)	Hrs.
1	Introduction to Design	Design as an activity and profession	2hrs.
2	History of Design in global context	Design timeline, milestones, designers	2hrs.
3	History of Design in Indian context, Design Specialisations	Design in India, important designers, Design in various streams	2hrs.
4	Experience Design	Designing the customer experience	2hrs.
5	Elements of Design	Design Principles	2hrs.
6	Gestalt Laws and Design, Design Thinking Process	Gestalt Principles, Design methodology	2hrs.
7	Design Thinking Tools	Brain storming, mind maps,& other tools	2hrs.
8	Design Research	Research methodology	2hrs.
9	User-centric Design, Geometry and Design	Persona and scenario tools, Fundamentals of Geometry	2hrs.
10	Fundamentals of Photography	Introduction to photography	2hrs.
11	Ergonomics and Design	Principles of ergonomics	2hrs.
12	Nature Inspired Design, Design for luxury	Principles of Biomimicry, Value addition through design	2hrs.
13	Design as cultural evolution	Design as cultural expression	2hrs.
14	Correction as per guidance by trainer	Correction as per guidance by trainer	2hrs.
15	Evaluation	Evaluation	2hrs.

Total Hours-30 hrs.

MIT ADT University, Pune School of Holistic Development

Syllabus for

**Year: Second
Semester: IV**

**Course: Design Thinking
Course Code: 23SHD1038
Credits – 1**

Syllabus (Semester-IV):-

	Contents	Assignments	Hours
Unit-1	Design for Social Needs, Presentation techniques,	Identifying design opportunities in social sector, Representation tools	6 Hrs.
Unit-2	3D CAD tools, Design and market opportunities	Introduction to 3D CAD softwares Design as market development activity	6 Hrs.
Unit-3	Design and technology, Workshop skills for model making, Storytelling in design	Technologies driving design, Introduction to workshop tools and machines, Storyboarding tools	4 Hrs.
Unit-4	Principles of Graphic Design, Elements of Typography	Composition, Introduction to Graphics Design software, Fonts, Grid layout, Publishing process	4 Hrs.
Unit-5	Branding and Packaging, Principles of 3-D form generation	Package Design process, Generating forms for 3D objects.	5 Hrs.
Unit-6	Colour, Material, Finish in design	CMF tools and process	5 Hrs.

Total- 30 Hours

IV - SEMESTER - DESIGN SESSION PLANNING

1 Session = 2hrs.

Sess ion	Theory (30 min.)	Assignments (90 min.)	Hrs.
1	Design for Social Needs	Identifying design opportunities in social sector	2hrs.

2	Presentation techniques	Representation tools,	2hrs.
3	3D CAD tools, Design, and market opportunities	Introduction to 3D CAD softwares, Design as market development activity	2hrs.
4	Design and technology	Technologies driving design	2hrs.
5	Workshop skills for model making	Introduction to workshop tools and machines	2hrs.
6	Story telling in design, Principles of	Storyboarding tools,	2hrs.
	Graphic Design	Composition, Introduction to Graphics Design software	
7	Elements of Typography	Fonts, Grid layout, Publishing process	2hrs.
8	Branding and Packaging	Package Design process	2hrs.
9	Principles of 3-D form generation Colour, Material, Finish in design	Generating forms for 3D objects.	2hrs.
10	Design and Innovation	How design enables innovation	2hrs.
11	Design for digital medium	Human – Machine Interaction (HMI) design fundamentals	2hrs.
12	Green design and sustainability	Principles of Green Design.	2hrs.
13	Systems Thinking	Difference between Design and Systems Thinking	2hrs.
14	Design for Business	Business canvas for Design Start up	2hrs.
15	Evaluation	Evaluation	2hrs.

Total Hours-30 hrs.

DESIGN RUBRICS FOR SEMESTER III & IV

Sr no	Parameters of Evaluation	Marks
1	Attendance and concentration	10
2	Clarity of imagination towards subjects	10

3	Uses of Design Fundamentals	10
4	Imagination and creativity	10
5	Neatness and finishing	10
6	Overall performance	10
7	MCQ About Basic & Fundamentals, Test at the time of session ending	10
8	Activeness / Involvement	10
9	Assignment display and presentation	20

Total marks – 100

Sr. no.	Evaluation rubrics	Details
1	Attendance and concentration	Interaction and question answer about lecture
2	Clarity of imagination towards subjects	Topic clarity in their assignments
3	Uses of Design Fundamentals	Effective use of Design Principles
4	Imagination and creativity	Conceptualization and Representation skills
5	Neatness and finishing	Quality of presentation
6	Overall performance	Class performance of students
7	MCQ About Basic & Fundamentals, Test at the time of session ending	10 Question each 1 mark
8	Activeness / Involvement	Taking efforts & interest during assignments
9	Assignment display and presentation	Students will display their work and will explain confidently their experience towards assignments

MIT ADT University, Pune
School of Holistic Development

Year: Second
Semester: III

Course: Sound Recording & Enhancement Technology
Course Code: 23SHD1039
Credits – 1

Course Code	23SHD1039			
Course Title	Sound Recording & Enhancement Technology			
Teaching Scheme	L	T	P	Credits
	0	0	2	1
Total Course Teaching Hrs.	30 Hours			
Pre-requisites: Candidates having interest in exploring the sound recording and develop his interest in the field of Sound Recording & Enhancement Technology.				
Course Objectives: The main objectives of the course are: • To sensitize non-technical students at the University to the basic understanding of sound recording concept and promotion in the larger pursuit of enhancing their self-employability and entrepreneurial skills. • To enhance student knowledge about the latest trends of Sound Recording.				
Course Outcomes: After studying the course, students will be able To apply the techniques and strategies required in the Sound Recording & to understand Sound Recording & Enhancement Technology.				
Course Description: The course aims at providing fundamental knowledge and exposure to Concept, theories and practices in the field Sound Recording & Enhancement Technology.				
Course Contents: Each session consists of 2 hours:				

Unit No.	Topics	Sessions
1	Introduction to Sound - What is Sound & Its Waveform Characteristics. Amplitude, Frequency, Wavelength, Phase, Harmonics.	2 sessions
2	Understanding Unit of Sound Decibel	1 session
3	Workflow of Sound Sound as an element of Cinema: -Pre-Production- production-Post-production -Elements of a soundtrack (dialogue, music, effects, songs) - Demonstration of Location Sound & Post Sound.	3 sessions
4	History of Sound The "Silent" era The "Acoustic" era The "Electrical" era The "Magnetic" era The "Digital" era	1 session
5	Sound as an element of Cinema: Elements of a soundtrack (Dialogue, BGM, Sound effects, Songs)	2 sessions
6	Creative use of elements of Sound in Cinema: Achieving creative purpose through techniques and technology.	1 session
7	Analysis of film soundtracks: Balance of level, Balance of content	2 sessions for 1k
8	Introduction to equipment basics, sync& others	1 session
9	Influence of classical music & folk music in Indian cinema	2 sessions
Total:		30 hours

Learning Resources:

The course instructors will share the specific lists of reference books, web resources, weblinks, and research journals in relation to each individual unit before the course starts.

Reference Books: Modern recording techniques by David Miles Huber and Robert E. Runstein

MIT ADT University, Pune
School of Holistic Development

Year: Second
Semester: III

Course: Digital and Financial Literacy
Course Code: 23SHD1041
Credits – 1

Course Code	23SHD1041			
Course Title	Digital and Financial Literacy			
Teaching Scheme	Lecture	Tutorial	Practical	Credits
	0	0	2	1

Pre-requisites: Candidates who are aware of the basics of Computer operations and possess the knowledge of basics of Finance and Banking.

Course Objectives:

The main objectives of the course are:

1. To provide learners with ample opportunities to be well versed with the modern technology of global requirements.
2. To prepare learners to make effective use various options for Data Management
3. To develop the student's self-confidence and nurture them into becoming experts in using cloud features
4. To apply financial learning in personal lives
5. To overcome fear of failure in technology by applying management strategies for Data Management.
6. To make students to be job-ready by providing them with the information of corporate requirements.

Course Outcomes: *After studying the course, learners will be able to:*

1. Know the advanced features of G-mail and its usage for all aspects.
2. Explore the opportunities of Google Utilities.
3. Write their own blogs, creating various forms as per the requirements.
4. Use the advanced options of MIS (Management Information System) in MS-Excel of Google Sheets.
5. Practice and invest to manage the future needs of finance.

6. Invest and analyse the investment options.
7. Understand the tax calculations.
8. Know more about retirement planning.

Course Description:

Digital and Financial Literacy is the course which focuses on student awareness about the digital world and enhance the knowledge by applying the learnings which is the requirement of an hour. This course covers the advanced features of all utilities of Google, MS-Excel, various cloud computing, Personal Finance Management.

Course Contents:

Unit No.	Topics	Hours
1	Google Utilities Subtopics: 1. Gmail's Advanced Features 2. Google Drive and Voice Typing in regional languages. 3. Basics of Google Sheets 4. Google Calendar 5. Blog Writing 6. Designing Google Forms 7. Advanced Google Sheets 8. Google Slides 9. Google Docs	12 hrs.
2	MS-Excel for Management Subtopics: 1. Advanced Conditional Formatting 2. COUNTIF, COUNTIFS Functions 3. Data Validation, Designing Budget Limit, Creating Check list 4. Usage of VLOOKUP, HLOOKUP, 360 degree lookup	6hrs.
3	Digi Locker Subtopics: 1. Registration process of Digi Locker 2. Usage of Digi Locker 3. Documents Fetching, uploading, sharing and Digital Validation	2 hrs.
4	Income Tax Subtopics: 1. Understanding Income Tax Rules 2. Tax Calculations Slabs with New Tax Regime and Old Tax Regime 3. Tax Saving Sections and Options	

		4 hrs.
5	Understanding Life Insurance Subtopics: 1. Types of Life Insurance 2. The process of Life Insurance 3. Understanding the maturity and claim process	2 hrs.
6	Basics of Mutual Funds Subtopics: 1. Types of Mutual Funds 2. How mutual Funds Work 3. How to choose the best options for investment	2 hrs.
7	NPS (National Pension Scheme) Subtopics: 1. Understand what is NPS 2. Explore the rules of NPS 3. Check how NPS works 4. Pension Calculations of NPS 5. Tax Savings by NPS	2 hrs.
Total:		30hrs.

Learning Resources:

Mobile applications, Internet connectivity, MS-Office, Gmail Account, Pen, Papers,

Pedagogy:

Learning by discussion, sharing practical examples and analysing the performance of Finance Industry.
