## 1. Brief Introduction

World Food Safety Day is observed annually to raise awareness about the importance of safe food in protecting public health and preventing foodborne illnesses. The theme for the World Food Safety Day celebration conducted on 8 June 2026 was **"From Burden to Solutions: Safe Food Everywhere."** The theme emphasized the need to transform food safety challenges into practical solutions through awareness, scientific approaches, good hygiene practices, and collective responsibility across the food supply chain.

To commemorate the occasion, School of Food Technology, in collaboration with the **Association of Food Scientists and Technologists (India) – Pune Chapter**, organized a webinar, food safety awareness activities for food handlers working in institutional messes, and the distribution of food safety kits. The webinar provided insights into contemporary food safety issues, regulatory requirements, and industry best practices, while promoting food safety awareness and safe food handling practices among all stakeholders.

The program featured two distinguished speakers, **Dr. Anjali Bhoite** delivered an engaging talk on **"Traditional Roots, Modern Responsibility: Advancing Food Safety Together."** In her presentation, she emphasized the importance of preserving traditional food practices while integrating modern food safety principles to meet current regulatory and consumer expectations. She highlighted how scientific advancements, hygienic food handling, and collective responsibility can help ensure the safety and quality of traditional foods without compromising their cultural significance. Her session encouraged participants to recognize the role of both tradition and innovation in building a sustainable and safe food system.

**Ms. Jyoti Nalase**, Founder and CEO of **SAGA Solutions – Consultancy & Training (Food Safety)** and a Freelance Food Safety Auditor for international standards such as **BRCGS Food, FSSC 22000, and ISO 22000**, delivered an insightful session on **"Food Safety in India: Growing Awareness, Food Recalls and the Importance of Food Safety Certifications."** She discussed the evolving food safety landscape in India, increasing consumer awareness regarding food quality and safety, and the significance of food recalls as an important mechanism for protecting public health. She further elaborated on the role of food safety certifications in ensuring regulatory compliance, enhancing consumer confidence, and improving market competitiveness. Through real-world examples and industry experiences, she highlighted the need for food businesses to adopt robust food safety management systems and maintain a strong food safety culture.

Together, the expert sessions provided participants with a comprehensive understanding of contemporary food safety challenges, regulatory requirements, and practical approaches for ensuring safe food across the food supply chain.

---

## 2. Objectives of the Program

1. To celebrate World Food Safety Day and spread awareness regarding safe food practices.
2. To educate participants about the importance of food safety in ensuring public health.
3. To understand emerging food safety challenges and food recall incidents in India.
4. To highlight the significance of food safety certifications such as ISO 22000, FSSC 22000, and BRCGS Food.
5. To bridge the gap between traditional food practices and modern food safety requirements.
6. To promote the adoption of safe food handling, personal hygiene, and sanitation practices among food handlers working in institutional messes.

### 3. Outcome of the Program

The webinar successfully achieved its intended objectives and provided valuable learning opportunities for participants.

1. Participants gained a comprehensive understanding of food safety concepts and their relevance in daily life and industry.
  2. Dr. Anjali Bhoite's session emphasized the need to preserve traditional food knowledge while ensuring compliance with modern food safety standards.
  3. Ms. Jyoti Nalase's presentation enhanced awareness regarding food recalls, regulatory compliance, and the role of internationally recognized food safety certifications.
  4. Participants developed a better understanding of quality management systems and food safety auditing practices.
  5. The interactive question and answer session enabled participants to engage with the experts and clarify their doubts related to food safety careers, certifications, and industry requirements.
  6. The webinar strengthened awareness about the collective responsibility of stakeholders in maintaining food safety throughout the food supply chain.
  7. Food safety awareness and food hygiene practices were promoted among food handlers in the University messes and food safety kits were distributed.

**Monday, 8th June 2026** **09.30 AM** **MODE: Online**

## 7. Glimpses of the Event:

The screenshot shows a Microsoft Teams meeting interface. The main window displays a presentation slide from 'saga' titled "When Things Go Wrong: The Anatomy of a Recall". The slide content includes:

- Understanding the distinction between a **recall** (public health risk, product retrieved from consumers) and a **withdrawal** (product removed from supply chain before reaching consumers) is critical for every food business operator.
- A **recall** is triggered when a product poses a health risk and has reached consumers — requiring public notification and product retrieval.
- A **withdrawal** occurs when the product is still within the supply chain and has not reached end consumers. Both require documented procedures under FSSAI regulations.
- A link: [Food Recall Excel Data export\\_1780724667398.xlsx](#)

On the right side of the Teams window, there is a grid of participant icons. The icons are labeled with initials and names: DC (Deepa Ch...), KP (Kavitha P...), BY (Bhargava V...), JN (Jyoti N...), SK (Sankar L...), AB (Anish B...), PS (Prashant S...), DM (Dr. Pallavi...), PJ (Prashant S...), and DC (Deepa Ch...). The 'JN' icon is highlighted with a blue border. At the bottom of the Teams window, there is a status bar showing the temperature as 29°C, the location as 'Mumbai, India', and the time as 12:25 on 08/06/2020.
